EDURED  1. East Ger-any in 1953 had a normal import requirement of led Settled Manager of aluminar, gold, silver and other metal bronzen. These bronzen are area in the printing industry and for language and paints. In 1954 the board in the printing industry and for language and paints. In 1954 the board incort of these bronzen will assume to only 36 metric terms. The these consistes for metal existes and will parcel out the 50 metric terms. The these industry.  A general chartage of cabalt exides also prevails. A total of from 30 to 20 %etric terms would normall, be needed for 1954. The planned importance and to 9 etric terms. Strict rationing measures are to be instituted for this commodity.  DEE Leipzig, which haddles the distribution of these metal exides to Cast Corner industry, recently had to make available 30 metric terms of warlous bronze exists to fill an important Russian order for the jumiting of board of working to the terms of the latter than the sugarant order. He additional bronze imports are planned at thus time. 2/	BJEC1	Shortare	of Metal (	XIdes		,		
REPORT NO.  1. East Germany in 1955 had a normal import requirement of 123 centro what of aluminum, gold, silver and other metal bronzes. These windless are weak in the printing industry and for language and maints. In 1954 the total intert of those bronzes will assume to only 30 metric tons. The state consists for metal axides and will parcel out the 30 metric tons of bronzes and scale radictry.  2. A general shortage of schelk exides also prevails. A total of from 30 to 30 Petric tons would normally be needed for 1954. The planned imports around to 9 metric tons. Strict rationing measures are to be instituted for this commodity.  3. OBS Leaping, which bendles the distribution of these metal exides to East German industry, recently had to make available 30 metric tons of various bronze exides to fill an important Russian order for the juniting of bolds. I howevery, the allocation for 1954 was not increased by the 30 metric tons taxon out for the Musican order. No additional bronze imports are planned at this time.  2. **Comment**  **Extends**: The comment is presumbly a cover for the printing of book notes.  **Extends**: The case of the comment of the comme				25X1A		NO. 1. East Ger any in 1953 had a normal import requirement of 120 detric tons of aluminum, gold, silver and other metal bronzes. These bronzes are used in the printing industry and for lacquers and maints. In 1954 the local infort of those bronzes will amount to only 50 metric tons. The third for metric for Material All calon has instituted strict lationing eclosures for metal excise and will parcel out the 30 metric tons of bronzes to make the adverse.  2. A general shortage of cabalt exides also prevails. A total of from 30 to 40 Tatric tons would normall be needed for 1954. The planned imports around to 9 setric tons. Strict rationing measures are to be instituted for this commodity.  3. DHE Leipzig, which bandles the distribution of those metal exides to flat formed bronze exides to fill an important Russian order for the junting of abolds. 1/ However, the allocation for 1954 was not increased by the 30 metric tons taken out for the Austian order. He additional bronze imports are planned at this time. 2/  X1A  1/ Comment. Bronze is usually imported from Test Germany; some leaser quantities from Czechoslovakia. The Czech quantity does not measure us to the quality of that which is supplied by Vest Germany.	-						A Company of the Comp	
1. East Germany in 1953 had a normal import requirement of 120 motific tons of aluminum, gold, silver and other metal bronzes. These bronzes are used in the printing industry one for incours and paints. In 1954 the houst instort of those bronzes will amount to only 30 metric tons. The Stanke Consistee for Materiel AD cation has instituted strict lationing adounted for metal society and will parcel out the 30 metric tons of bronzes to got the structure for metal society.  2. A general chartage of cohalt exides also prevails. A total of from 30 to 40 metric tons would normall by needed for 1954. The planned imports account to 9 metric tone. Strict rationing measures are to be instituted for this commodity.  3. Bud Leipzir, which handles the distribution of those metal exides to East Carner industry, recently had to make available 30 metric tons of various bronze exides to fill an important Russian order for the printing of labels. 1/2 However, the discation for 1954 was not increased by the 50 metric tons taken out for the Aussian order. We additional bronze imports are planned at thus time. 2/  2/  Comment. This is presumably a cover for the printing of bank notes.  Comment. Bronze is usually imported from Test Germany; some lever quantities from Czechoslovakia. The Czech quality does not because us to the quality of that which is supplied by West Germany.								
of aluminum, gold, silver and other metal bronzes. These contents in the printing industry one for incquers and paints. In 1954 the total infort of those bronzes will amount to only 30 metric tons. The distal infort of those for Material All cation has instituted strict intioning ecoures for metal exides and will parcel out the 30 metric tons of bronzes to metal or midstry.  2. A general shortage of cabalt exides also prevails. A total of from 30 to 40 Retric tons would normall, by needed for 1954. The planned imports are and to 9 metric tons. Strict rationing measures are to be instituted for this commodity.  3. BHE Leipzig, which handles the distribution of these metal exides to make Cormen industry, recently had to make available 30 metric tons of various bronze exides to fill an important Russian order for the granting of labels. It however, the allocation for 1954 was not increased by the 30 metric tons taken out for the Russian order. No additional bronze imports are planned at this time.  2/  X1A  1/ Corment. This is presumably a cover for the printing of bank notes.  X1A  2/ Comment. Bronze is usually imported from Test Germany; some lesser quantities from Czechoslovakia. The Czech quality does not measure up to the quality of that which is supplied by West Germany.								25X1X
A general shortage of cabalt oxides also prevails. A total of from 30 to 40 Petric tons would normally be needed for 1954. The planned imports arount to 9 metric tons. Strict rationing measures are to be instituted for this commodity.  5. BHZ Leipzig, thich handles the distribution of these metal oxides to Dact Germen industry, recently had to make available 30 metric tons of various bronze exides to fill an important Russian order for the frinting of labels. 1/ However, the allocation for 1954 was not increased by the 30 metric tons taken out for the Russian order. No additional bronze imports are planned at this time. 2/  X1A    Comment.   This is presumably a cover for the printing of bank notes.    Comment.   Bronze is usually imported from Test Germany; some leaser quantities from Czechoslovakia. The Czech quality does not measure up to the quality of that which is supplied by West Germany.
